

ACTUAL OUTPUT OF OUR PROJECT

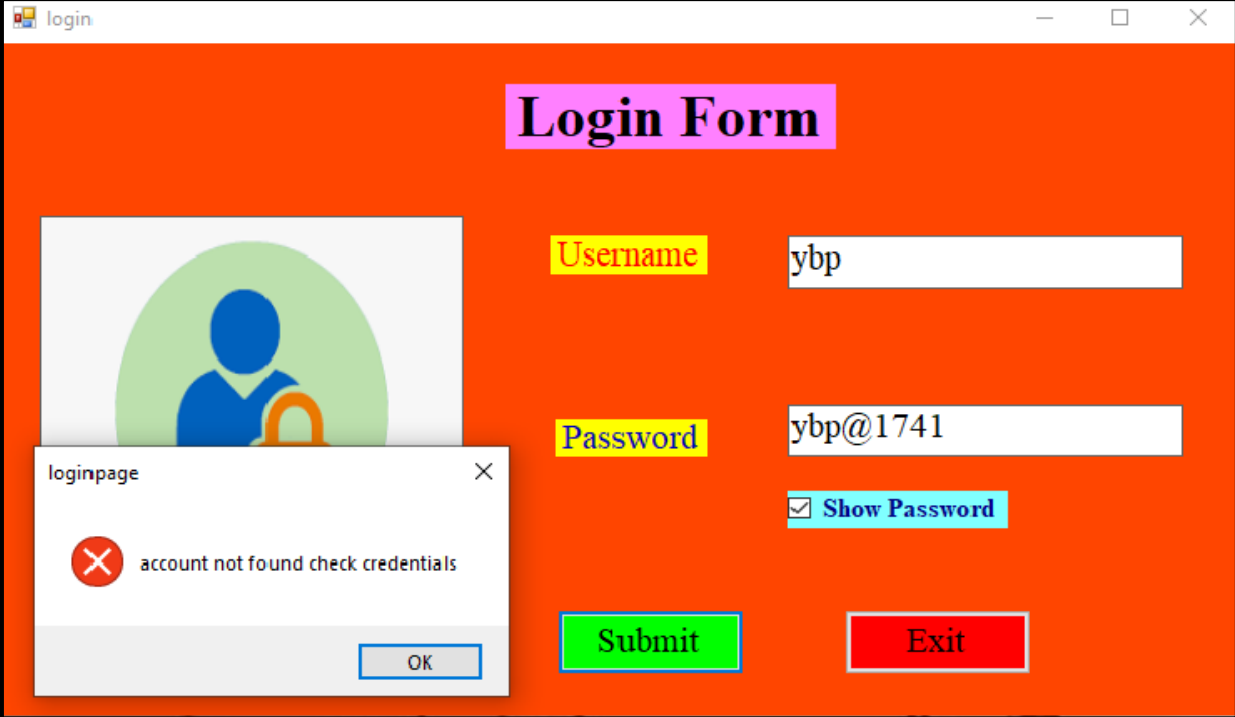

1. when user clicks on submit button without entering password and username then following message is generated.

2. When the user selects only one option from the password or username then the following message is generated.

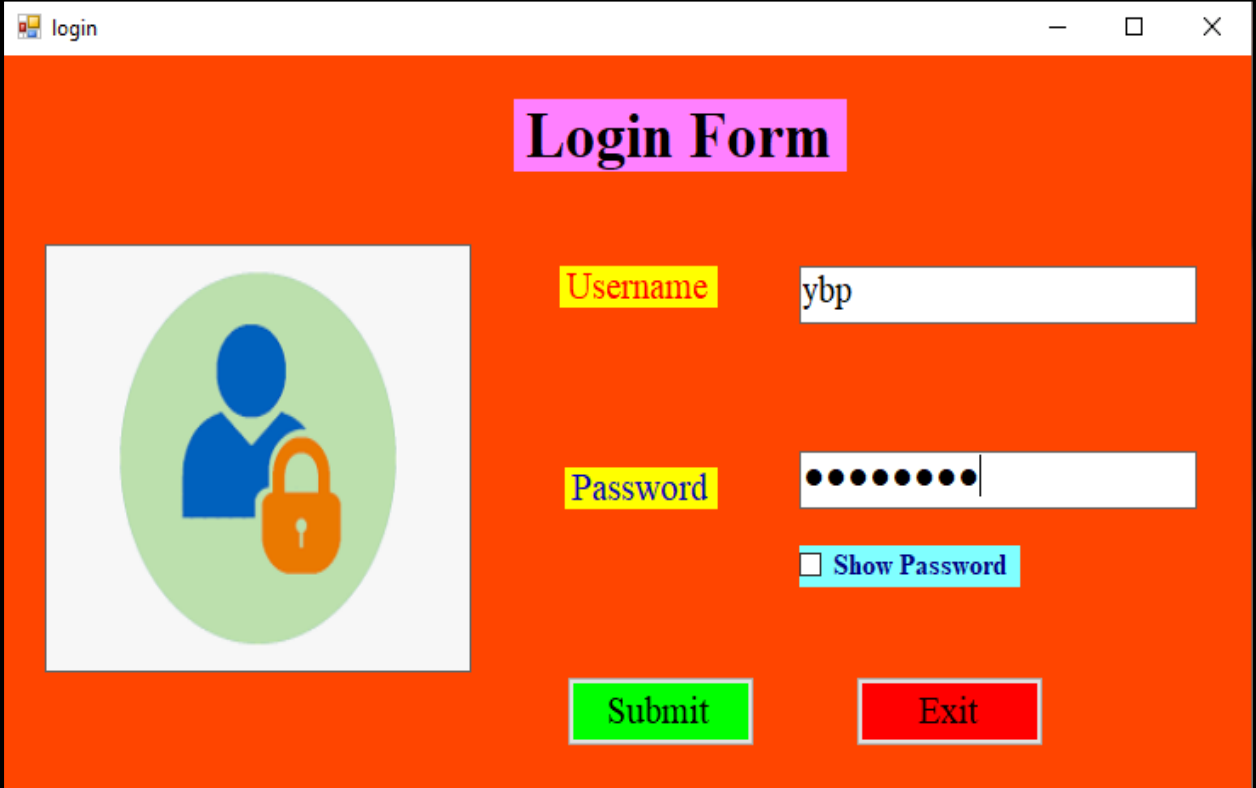

3. When you enter wrong password as well as wrong username then following message is generated.

The screenshot shows a window titled "login" with an orange background. At the top center, the text "Login Form" is displayed in a pink box. On the left, there is a placeholder image for a user profile. To the right of the image, the "Username" field contains "ybp" and the "Password" field contains "ybp@1741". Below the password field, there is a checkbox labeled "Show Password" which is checked. At the bottom, there are two buttons: "Submit" (green) and "Exit" (red). A small error dialog box titled "loginpage" is open in the foreground, displaying a red "X" icon and the message "account not found check credentials", with an "OK" button at the bottom.

4. When the user wants to see the hidden password, he has to click on the show password Button which is shown in a following picture.

The screenshot shows the same "login" window. The "Username" field still contains "ybp". The "Password" field now displays ten black dots, indicating the password is hidden. The "Show Password" checkbox is now unchecked. The "Submit" and "Exit" buttons remain at the bottom. The user profile placeholder image on the left is also visible.

login

Login Form

Username ybp

Password ybp@1742

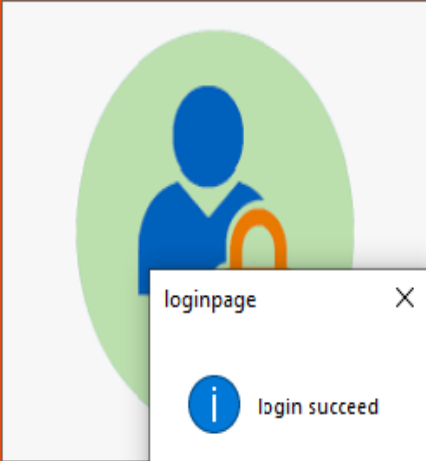

☒ Show Password

Submit **Exit**

5. When user enters the correct password and username, the following message is displayed.

login

Login Form

Username ybp

Password ybp@1742

☒ Show Password

Submit **Exit**

loginpage

 login succeed

OK
